

Certificate of Actuarial Studies

Advanced Level

The Salzburg Institute of Actuarial Studies offers a programme for practising actuaries consisting of the following six courses, each of which can be completed with a separate examination:

1. Fundamental Statistical Methods in Insurance
2. Advanced Statistical Methods in Insurance
3. Actuarial Modelling
4. Risk Management in Insurance
5. Instruments and Strategies of Corporate Investing
6. International Accounting of Insurance Companies

One course is offered per semester, each course taking place over 3½ days. The “Certificate of Actuarial Studies – Advanced Level” will be issued after the examinations for each of the six courses have been passed. The administrative fee, which is to be paid for the issuance of the certificate once all the conditions have been met, is currently €30.

The aim of the programme is not only to provide practising actuaries with relevant and detailed knowledge of new developments (in particular Solvency II), but also to add advanced techniques to the standard skills of actuaries who completed their education some time ago. The programme as well as each of the courses is ideally suited to fulfilling CPD requirements.
